PROJECTS

Garista, White Hat Digital Agency Limited

A cloud-based restaurant management platform that streamlines operations and enhances customer experiences. It offers features like real-time analytics, reservation management, and inventory tracking. As a core developer, I contributed to building the platform using **Next.js, TypeScript, React.js, Laravel, Firebase, MySQL**, and **Stripe** for payment processing.

WaseetAI, Freelance Project

WaseetAI is an AI-powered platform that connects users with expert consultants across multiple fields. The platform provides personalized advice using AI, supports real-time chat interactions, and ensures secure payment processing. It leverages advanced matching algorithms to pair users with the most relevant consultants based on their needs. **Technologies used:**

Angular, Express.js, MongoDB, GraphQL, Docker, AWS, Firebase and Matching algorithms.

A HOUSE GURU, Innov IT Firm Project

A platform connecting homeowners with skilled professionals, featuring user authentication, profiles, real-time chat and secure payments. **Technologies used: Next.js, Express.js, MongoDB, GraphQL, and Firebase.**

Volunteer-Travel, Freelance Project

A platform connecting tourists with local guides in the Gulf Sahara region. with user authentication, profiles, real-time chat and secure payments. **Technologies used: Docker, Angular, Express.js, MongoDB and RESTful API.**

Ft_transcendence-42 Common Core Curriculum, Team project

Online platform for a multiplayer ping pong game with 1v1 online/local gameplay, online/local tournaments, AI opponents, user authentication, profiles and real-time chat. **Technologies used: Docker, React, Django and RESTful API.**

1337 (42 Network) @ UM6P Common Core, Team and Solo Projects

Worked on **1337 school** projects, inspired by the **42 Common Core** curriculum, gaining expertise in software development, **C/C++, Linux, Git, Docker, algorithms**, and other technical skills. Developed critical soft skills, including teamwork,

adaptability, and self-reliance, through **42s peer-to-peer learning methodology**.

SKILLS

Hard Skills: C, C++, Linux, Git, GitHub, Docker, HTML, CSS, JavaScript, Python, TypeScript, React, Next.js, Angular, Express.js, Node.js, Django, SQL, MySQL, NoSQL, MongoDB, AWS, RESTful API, GraphQL, Postman API, Agile Methodologies

Soft Skills: Adaptability, Communication, Problem Solving, Teamwork

Languages: English, French, Arabic
